Subject: Gold King Mine spill map

Just fyi, you may be hearing about the big mine spill in Colorado. Here is a map which shows the area. The spill happened at the headwaters of the Animas River (just under the "C" of Colorado. It went down the Animas River in Colorado (Region 8). Then into New Mexico (Region 6) where the Animas River joins the San Juan river in Farmington, NM. Downstream into the Navajo Nation in Western NM. I think Region 9 does all things Navajo. Then on into Utah (Region 8 again). But the San Juan is the border of the Navajo Nation, so we would still be involved. Finally, the San Juan joins the Colorado River and flows back into Arizona (Region 9).
